

**MULTIFUNCTION HANDLE FOR A REMOVABLE STORAGE OR OTHER  
REMOVABLE COMPUTER DEVICES**

**ABSTRACT OF THE DISCLOSURE**

5           A removable device, such as a removable mass storage device, includes a  
multifunction handle coupled to the device. The multifunction handle includes a  
force-developing portion and includes an interlock portion adapted to be engaged  
by an interlock component. The handle develops an insertion force at the force-  
developing portion responsive to a force applied to the handle, and also secures  
10 the removable device in a desired position to prevent use of the handle responsive  
to the interlock portion being engaged by the interlock component.
